OCTAVIA

SLX 20V

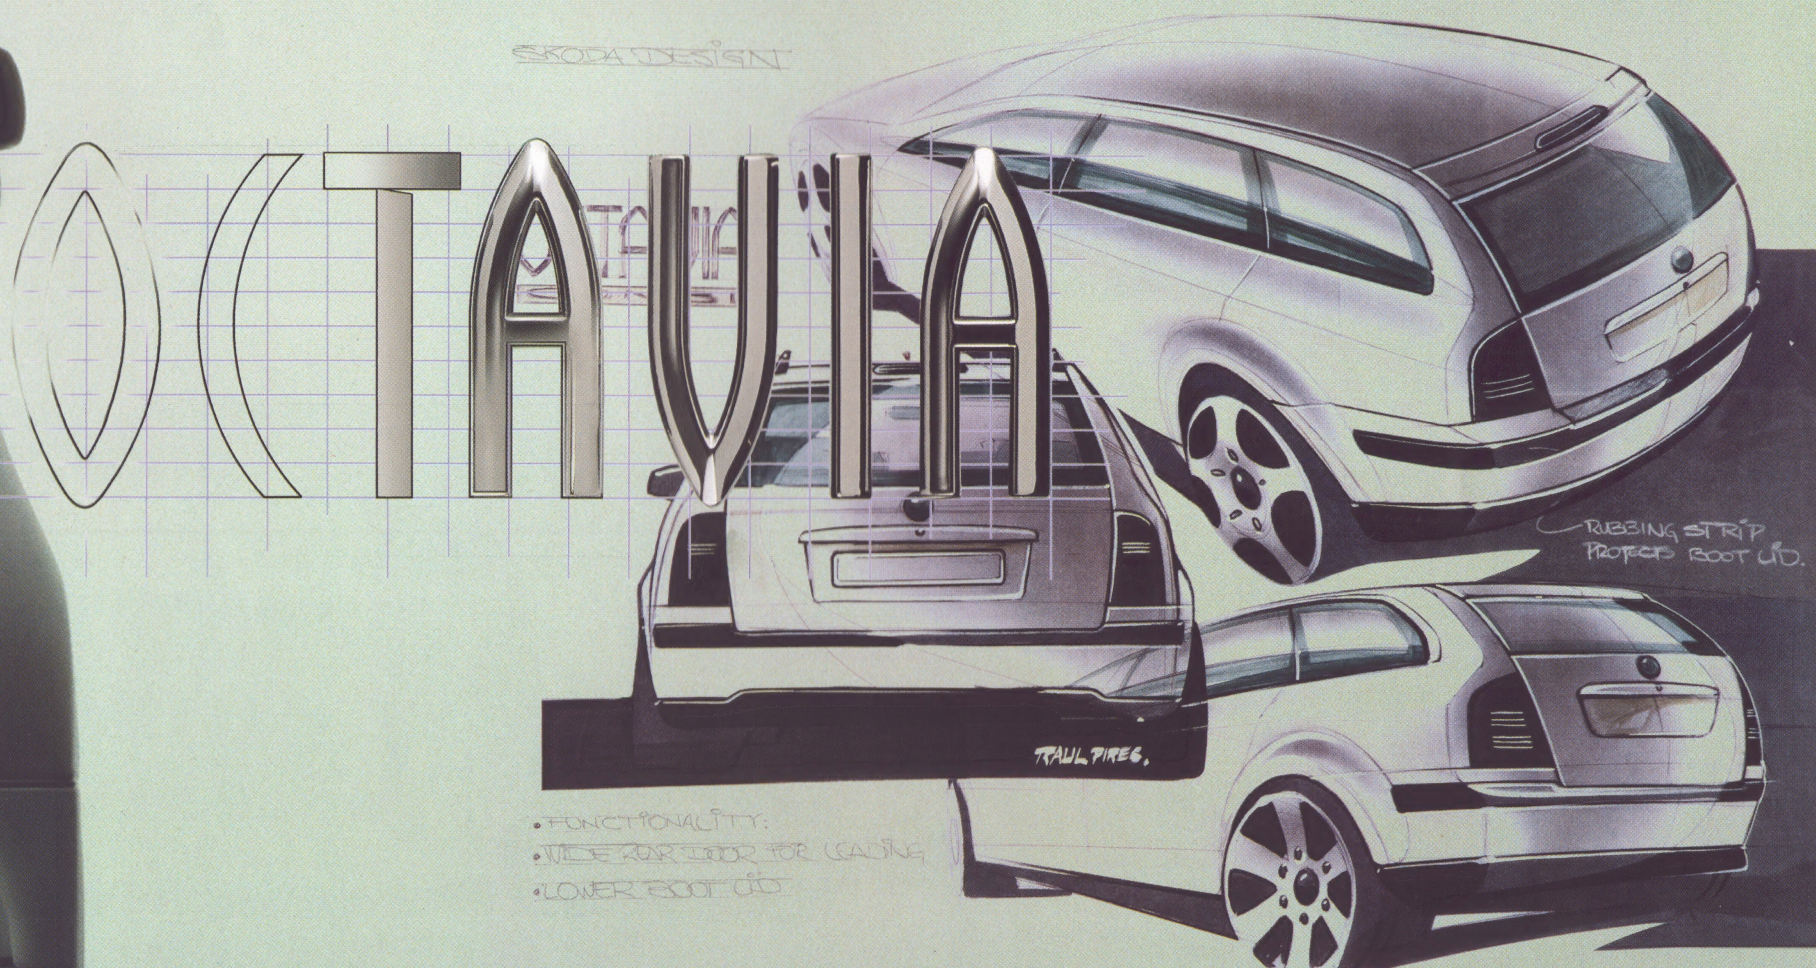

OCTAVIA

**F**rom every angle the Octavia Estate is uncommonly attractive: one of those rare estate cars that can boast an exceptional load capacity without sacrificing style or good looks. The grille, with its famous Škoda badge, is elegant and restrained. The sweep of the windscreen pillars naturally leads your eye back, towards the tailgate, which has a neatly integrated high level third brake light and, on the rear flanks, the unusual and highly visible 'Brilliant Optics' rear light clusters. With shades of early 20th Century Czech cubist architecture, the Octavia Estate is highly individual and charismatic as befits a car with many hundreds of hours devoted to it by our designers and engineers. Smooth and highly responsive, it's a real pleasure to drive and is easy to live with. It comes with a 3 year unlimited mileage warranty, a 3 year/45,000 mile Service and Maintenance package and 3 years Europe wide AA cover. But isn't that the way things should be?

## BEAUTIFUL, INDIVIDUAL, PRACTICAL

## A TRADITION OF PROGRESS

**T**he origins of Škoda go back over a century to the two men who started the company, Laurin and Klement. Then, as today, the marque was noted for engineering innovations, unerring reliability and comfort. The graceful and rapid sports cars that were later developed to publicise the Škoda name swept all before them, to be followed by even greater success in rallying with Škoda cars becoming almost folklore by claiming more class wins than any other manufacturer. Much of what we learned on the race tracks and forest roads is built into our cars today.

## THE NEW FACE OF ŠKODA

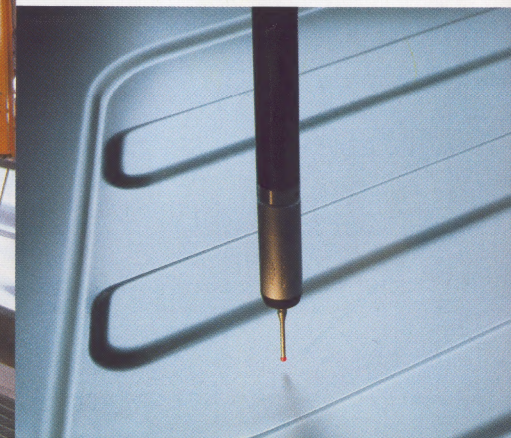

**T**he Octavia Estate is built in one the world's newest and most modern car production facilities. Starting from scratch we were able to create an environment which positively encourages the highest standards of quality, by establishing the ideal conditions for our skilled technicians. Naturally, all equipment is state-of-the-art, achieving industry-leading standards for accuracy and efficiency. An important bonus of using such advanced technology is our ability to keep close control over environmental issues, with reduced energy consumption, increased recycling of materials and minimal emissions. For example, our paint shop, which uses predominately water-based paints, has a sophisticated purification plant to ensure the cleanliness of any water which is released at the end of the painting process.

Advanced techniques are used to ensure accuracy throughout construction, right down to the thickness and shine of the paint. Even so, it's the expert eyes of our quality control inspectors that give the final approval.

The precise dimensions of each component are accurately checked by a computer controlled unit.

## OUR COMMITMENT TO QUALITY

**Q**uality means precision, and precision is evident at every stage of Octavia Estate production. Several key parts, such as the dashboard and suspension units, are built as sub-assemblies for greater accuracy of construction, then introduced to the bodyshell on a production line which moves slowly enough to allow each technician to carry out their task at an unhurried pace. Such dedication to detail, plus a comprehensive programme of corrosion-prevention measures, allows us to show our faith in the quality of the Octavia Estate with a guarantee against rust perforation for a full ten years.

Constantly repeating a task to millimetre-precision is best performed by machine. In this case, robot welders ensure the consistent strength of every Octavia bodyshell.

## THE NEW SPACE OF ŠKODA

**A** jewel amongst practical load carriers, the Octavia Estate is aesthetically pleasing from every angle, with a harmonious design that always appeals, no matter how often you see it. Yet this is beauty that's more than skin deep. The Octavia Estate is extraordinarily accommodating, with a generous 548 litres of luggage space – and that's before you fold down all or part of the 1/3 - 2/3 split rear seat. And with the rear seats folded down, the Estate gives you an astonishing 1512 litres of flat, able load space that's 1.7 metres long and, thanks to the clever rear suspension design, low and flat over its entire length – an uncommon and very practical benefit.

## INVITING AND INSPIRING

**W**hether driver or passenger you'll appreciate the Octavia Estate's creature comforts and refined equipment levels. The light and airy cabin is welcoming with its smart fabrics, and the seats provide anatomically correct support to make even the longest journey a pleasure. On SLX models, rear seat passengers enjoy the added convenience of reading lights, whilst every model in the range features a highly effective heating and ventilation system. It helps you stay wonderfully warm in winter and comfortably cool in summer, with the added benefit of air recirculation to keep the cabin free from traffic-jam fumes. You'll also benefit from air conditioning, twin airbags, power steering, high level third brake light, an RDS radio/cassette player and ISOFIX child seat mounting points that fix the seat directly to the chassis.

All models include an on-board computer to relay valuable information such as the time, your average and current fuel consumption, journey time and outside temperature.

## YOU'RE IN CONTROL

**W**ith its sweeping lines, dark anti-reflective covering and large clear instruments, the dashboard design puts you completely in control. The ergonomically-arranged layout ensures all switches are easily at hand, whilst the green background instrument illumination is both effective and easy on the eye, making night driving less of a strain. This dashboard design is standard across the range. On SLX models you'll find a band of darker tinted glass along the top of the windscreen and all models in the range feature a central sunvisor to shield you from the distracting glare of direct sunlight. All sensible touches. And all typical of Škoda.

The four-speed automatic gearbox features "Fuzzy logic" microprocessor control, which adapts the gear changes to suit your personal driving style.

In true Škoda fashion, the Octavia Estate is excellent value, offering more than generous equipment levels. For example, even the base model has more standard features than comparable cars in its class, including height-adjustable front seats, power steering, electronic engine immobiliser, height-adjustable seat belts and even a pollen filter. All models feature central locking with deadlocks, and are also equipped with an automatic electronic 'sleeper', which monitors the status of the interior light and stereo after you've left the car, to prevent battery drain. If you leave the Octavia Estate with either headlights or indicators on, a warning buzzer sounds.

## FUNCTIONAL AND PLEASING

To prevent injury to fingers, particularly children's, special sensors prevent the electric windows closing if they encounter an obstruction.

Electric door mirrors are operated from a single joystick, making it easy to simultaneously position them exactly as you want.

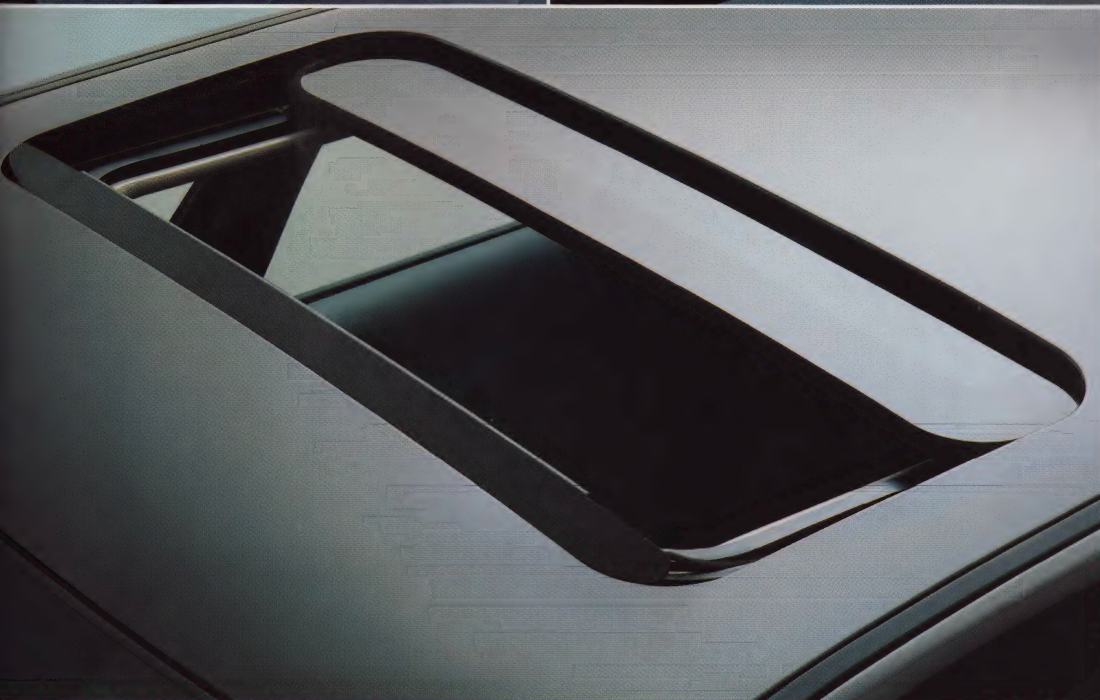

Sculptured seats provide more knee room for rear seat passengers, whilst front seat pockets offer useful storage space for maps, holiday guides or the children's comics.

The front and rear armrests do more than support your arm: when you flip their lids they provide handy storage space.

Electrically powered, the glass sunroof tilts at the rear or slides fully back to provide plenty of fresh air.

The adjustable steering wheel can be moved fore and aft as well as up and down for a perfect driving position.

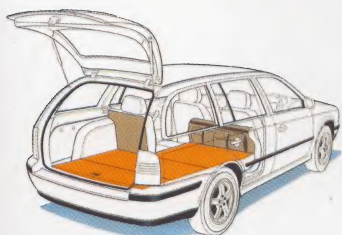

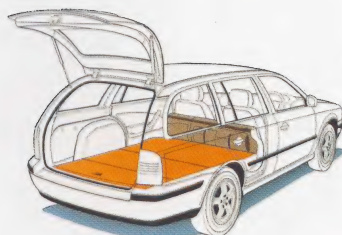

# VERSATILE AND PRACTICAL

**T**he Octavia Estate is packed with intelligent design features, to give you more practical space to use. Even with five people on board, the large load space still allows you to carry enough luggage for a long holiday. With the rear seats folded, you have the capacity to indulge your sports and hobbies, with room for everything from surfboards to a double bass. And the low sill makes light work of getting it all on board. For added security there's a full length retractable parcel shelf.

With just one rear seat back folded flat, the boot is already able to accommodate bulky loads.

With both rear seats folded flat a cavernous 1512 litres of space is available.

Split-floor feature N/A in UK.

More load-carrying room than most cars in its class makes the Octavia Estate a really practical carrier, especially when you use features such as this load-securing boot net.

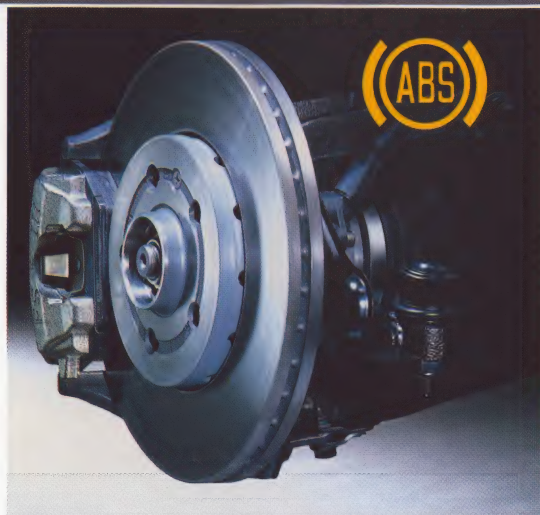

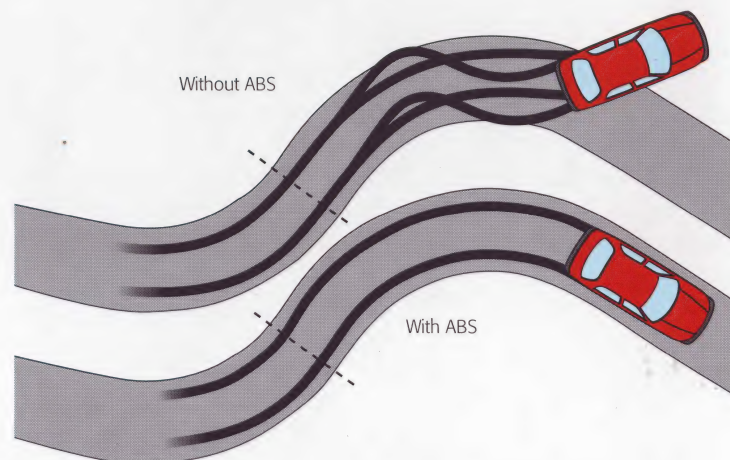

## RESPONSIVE AND RESPONSIBLE

**T**he Octavia Estate's sure-footed roadholding matches its performance to make this a real driver's car. It's also an important part of its active safety programme. The independent front suspension has MacPherson struts and an anti-roll bar for extra stability, whilst the torsion-beam rear suspension is designed for effective shock absorption and predictable cornering - even when fully laden. All Octavia Estate models have powerful braking systems with ventilated front discs for consistently good performance, even after repeated use. With the standard ABS system the wheels are prevented from locking, so you can steer under emergency braking. SLX models also have EDL (Electronic Differential Lock) which optimises traction on slippery surfaces. All further proof of our responsible approach to performance. Good visibility not only applies to the large area of glass but also the clear instrument layout. With all this, and the advantage of adjustable driver's seat and steering wheel the Octavia Estate makes it easy to be fully in control.

ABS rapidly applies and releases the brakes, achieving maximum braking effort without locking the wheels. This means that, even though you're braking as hard as possible, you can still steer clear of trouble.

## YOU'RE IN SAFE HANDS

**T**he Octavia Estate's passive safety performance is equally reassuring. In computer simulations and actual crash tests, the Octavia Estate exceeded the demands of all current and anticipated safety regulations. The outstandingly rigid and strong bodyshell incorporates computer-designed crumple zones that deflect impact and deform progressively to help safeguard the passenger compartment. There are also solid anti-intrusion bars in all four doors and sills. Full-size driver and passenger airbags and seat belt pretensioners are standard on all models. Side airbags are available on SLX models. The seats, as well as holding you firmly and comfortably, are shaped to prevent you from slipping forward under the seat belts if your car is hit from behind. Naturally, we hope you'll never need all this protection. But it's reassuring to know that when you're in an Octavia Estate you're in one of the safest cars on the road.

Factory-installed anchor points ensure maximum security for your child by anchoring any child seat that conforms to the international ISOFIX system to the chassis.

Working in unison, the seat belt pretensioners and airbags protect you by limiting the amount your body moves under emergency braking and providing a shock-absorbing cushion between you and the car's interior.

Full-size front airbags work in conjunction with seat belt pretensioners to help provide extra safety.

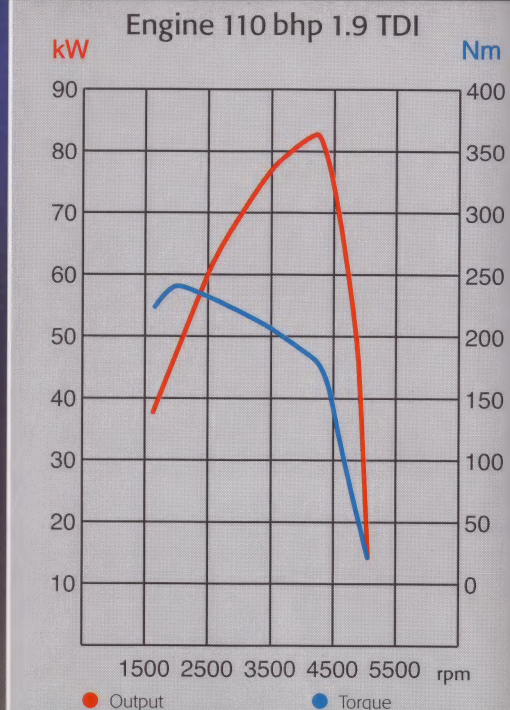

## ENJOY THE OPEN ROAD

**W**ith a range of responsive petrol and diesel engines, matched to precise, smooth-shifting gearboxes, we make it easy to satisfy your personal preference for performance and economy. The highly flexible 1.8 20V petrol engine gives you effortless acceleration whilst still making the most of fuel economy. Like all our petrol models, including the 101 Bhp 1.6, it's equipped with MPI (multi-point fuel injection) for increased efficiency, smooth power delivery and cleaner emissions. You'll purr along the motorways and zip through busy city traffic. It gives you the kind of thrill that lets you enjoy the driving experience all over again. Those seeking the easiest possible driving experience should choose the 125 Bhp 20V 1.8 with our sophisticated electronically-controlled automatic gearbox. This four-speed unit uses "Fuzzy logic" intelligent microprocessor circuitry which adapts the change points of the gearbox to suit your driving style. For example, if you want brisk acceleration, the "Fuzzy logic" will delay upward gear changes. Conversely, if you're aiming for maximum economy, the gearbox will change into a higher gear as soon as possible, keeping engine revs and fuel consumption low.

## REFINED AND RELIABLE

**F**or the most outstanding economy, opt for our 90 Bhp 1.9 litre TDi or 110 Bhp 1.9 TDi direct injection turbo diesels, which combine the traditional benefits of durability and frugal fuel consumption with remarkable smoothness and refinement. Our diesel engines use a recently-developed method of progressive direct fuel injection with a five-hole jet for perfect atomisation, resulting in impressive torque and worthwhile fuel savings at higher engine speeds. The 110 Bhp TDi engine not only benefits from forced injection for greater efficiency, but also from VTG (Variable Turbine Geometry). This adjusts the angle of the turbocharger blades to maintain optimum pressure at any engine speed, with consequent gains in usable power and economy. All diesel models are equipped with a smooth and precise five-speed manual gearbox that's a pleasure to use.

**T**he Octavia Estate's elegant lines are completed by an appealing range of colours, applied to the highest standards in one the most advanced paintshops in Europe. Effective protection against corrosion and exacting quality control means that we confidently support every Octavia Estate with a three year paint guarantee. The high quality fabric and other materials used in our Octavia Estate ensures that its interior will also keep its good looks for many years. There are two different trim materials available, with three colour patterns for the GLX models.

## BE ORIGINAL

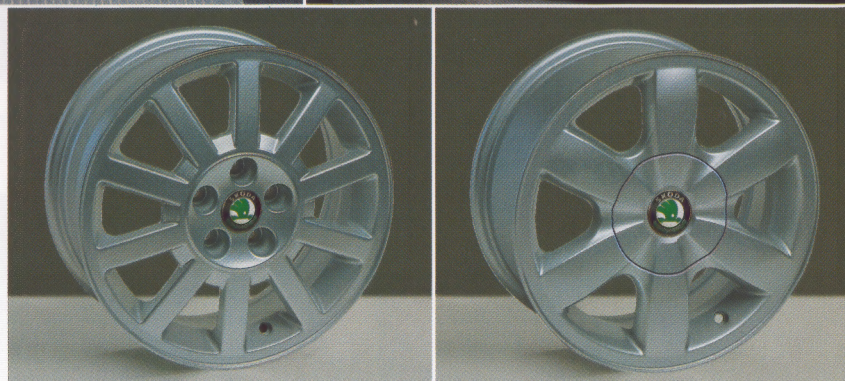

**T**he Octavia Estate is undoubtedly well-equipped, yet there are plenty of opportunities to personalise it to your tastes, with a range of Škoda accessories available from your authorised dealer. By choosing Škoda Original Accessories, you'll enjoy two valuable benefits. First, you'll be tailoring your Octavia Estate to suit your precise requirements and you'll have the reassurance of using quality items made specifically for your car, offering greater safety and reliability than non-original items. Second, the long service life and minimum one year guarantee of original Škoda accessories make them excellent value for money. Talk to your dealer about the full and exciting range.

These storage bags attach to the rear seat backs and keep smaller items clean, tidy and safe.

Designed to fit directly to the Octavia's chassis for extra safety, this comfortable seat has washable fabric for total practicality.

How do you make a good-looking car even more appealing?  
By choosing one of these alloy wheels: smart, strong and specially made for the Octavia.

# HELPFUL AND DEPENDABLE

**Y**our Škoda dealer will care for and cherish your new Octavia as much as you do. Which is why in recent surveys Škoda dealers came out top in Europe for customer care. It's not just that they service and maintain your Octavia to the highest standards, not just that their technicians are specially trained in all aspects of Škoda cars, or that most spares are carried in stock or delivered within 24 hours. It's more that they believe in old fashioned service. You're not just a number to them but a valued customer. Which is why they are more than willing to listen and help with any enquiries or problems you may have.

## **220 DEALERS IN THE UK.**

So there's bound to be one near you. Which means faster service, help and advice when you need it.

## **FREE SERVICING FOR 3 YEARS/45,000 MILES**

Every Škoda Octavia comes with a low on-the-road price and free servicing for the first 3 years or 45,000 miles saving you a small fortune.

## **3 YEAR UNLIMITED MILEAGE WARRANTY**

So sure are we of the quality and reliability of the Škoda Octavia that each one comes with a 3 year unlimited mileage warranty. And a 10 year anti-perforation warranty.

## **FREE AA MEMBERSHIP FOR 3 YEARS**

Accessed through a dedicated Freephone number, this free back-up service includes Europe wide Roadside Assistance, Home Start, Relay and Relay Plus.

## **EXCLUSIVE INSURANCE PACKAGE**

Attractive insurance rates are available to all Škoda owners from the Volkswagen Insurance Company (GB) Ltd who have specialised in motor insurance for over 30 years. Call the Quotations Hotline on 0345 616161.

## **ATTRACTIVE FINANCE**

Škoda Finance will tailor a financial package to suit your monthly budget. Simply ask your dealer which is the best deal for you. Credit subject subject to status, written details on request.

## **ŠKODA SOLUTIONS**

Gives you flexibility and peace of mind. Right from the start you'll know the monthly cost, the initial deposit and even the final payment (Guaranteed Minimum Value). Subject to status, written details on request.

## **ŠKODA MOBILITY**

People in receipt of the Higher Mobility Component of the Disability Living Allowance receive special help from Škoda. Preferential prices on low cost contract hire is available through your local approved Motability Dealer. For full details, contact your dealer.
